# *Italian Economic History towards 2020: debates and trajectories*

**12-13 maggio 2011, Siena, Dipartimento di Economia Politica (Aula Goodwin)**

The aim of the workshop is to provide a survey of the current debates in Italian economic history in comparative perspectives and its possible trajectories in the next decade. The workshop aims at assessing the role of Italian historiography in comparison with major themes and debates currently going on inside the discipline at international levels: for example publications in top journals, books, and participation to major conferences. The workshop also aims at assessing the relevance and interest for the Italian case in the general debates.

Each author should present a short review (3.000/5.000 words + half an hour presentation) to be discussed informally. Deadline for submission: 15 April 2011.

Programma:

**Giovedì 12 maggio ore 14.30**
